estridfinance

COMPANY PORTFOLIO

ABOUT THE COMPANY

Estridfinance is a global systematic investment platform. We have a long track record investing in private and global companies and operate as an independent private equity pledge fund. We invest our capital alongside capital from high-caliber private and institutional investors without a defined exit period.

Our centralized research focuses on the development of advanced quantitative techniques for uncovering market opportunities and employs them within a disciplined framework that results in efficient exposures.

With a robust infrastructure and talented investment professionals, Estridfinance offers clients the scale of a large asset management firm, with the benefits of a versatile investment platform - flexibility and customization. Our firm is able to offer institutional and retail investors the essential building blocks for today's changing investment landscape.

Using advanced methods of making business and a personal approach to each investor, we propose a novel financing example to people who want to maximize earnings, but also as a strong source of solid returns.

Estridfinance company uses only advanced trading tools and trades at the most steady markets, which minimizes the uncertainty of financial loss to investors and guarantees them a steady income accrued every calendar day.

OUR PRINCIPLES AND AMBITION

WE APPROACH SUSTAINABILITY FROM THREE PERSPECTIVES: AN ASSET OWNER, AN ASSET MANAGER, AND AS A COMPANY IN OUR OWN RIGHT

While our responsibilities and obligations in each of these three roles may differ, as we discuss below, our approach in all three is united by a common set of principles and ambitions, set out in the box at the bottom of the page.

We serve as an asset owner on behalf of Prudential With-Profits policyholders, and our pensions and annuity customers. This means we make decisions about how to allocate money to different asset classes and which asset manager should manage our money.

We also have the important responsibility of deciding the financial outcomes we want our asset managers to deliver for us, and the sustainability considerations we require them to apply.

For example, if we think that a certain industry does not have a sustainable future, we may require that the asset manager does not invest in that industry.

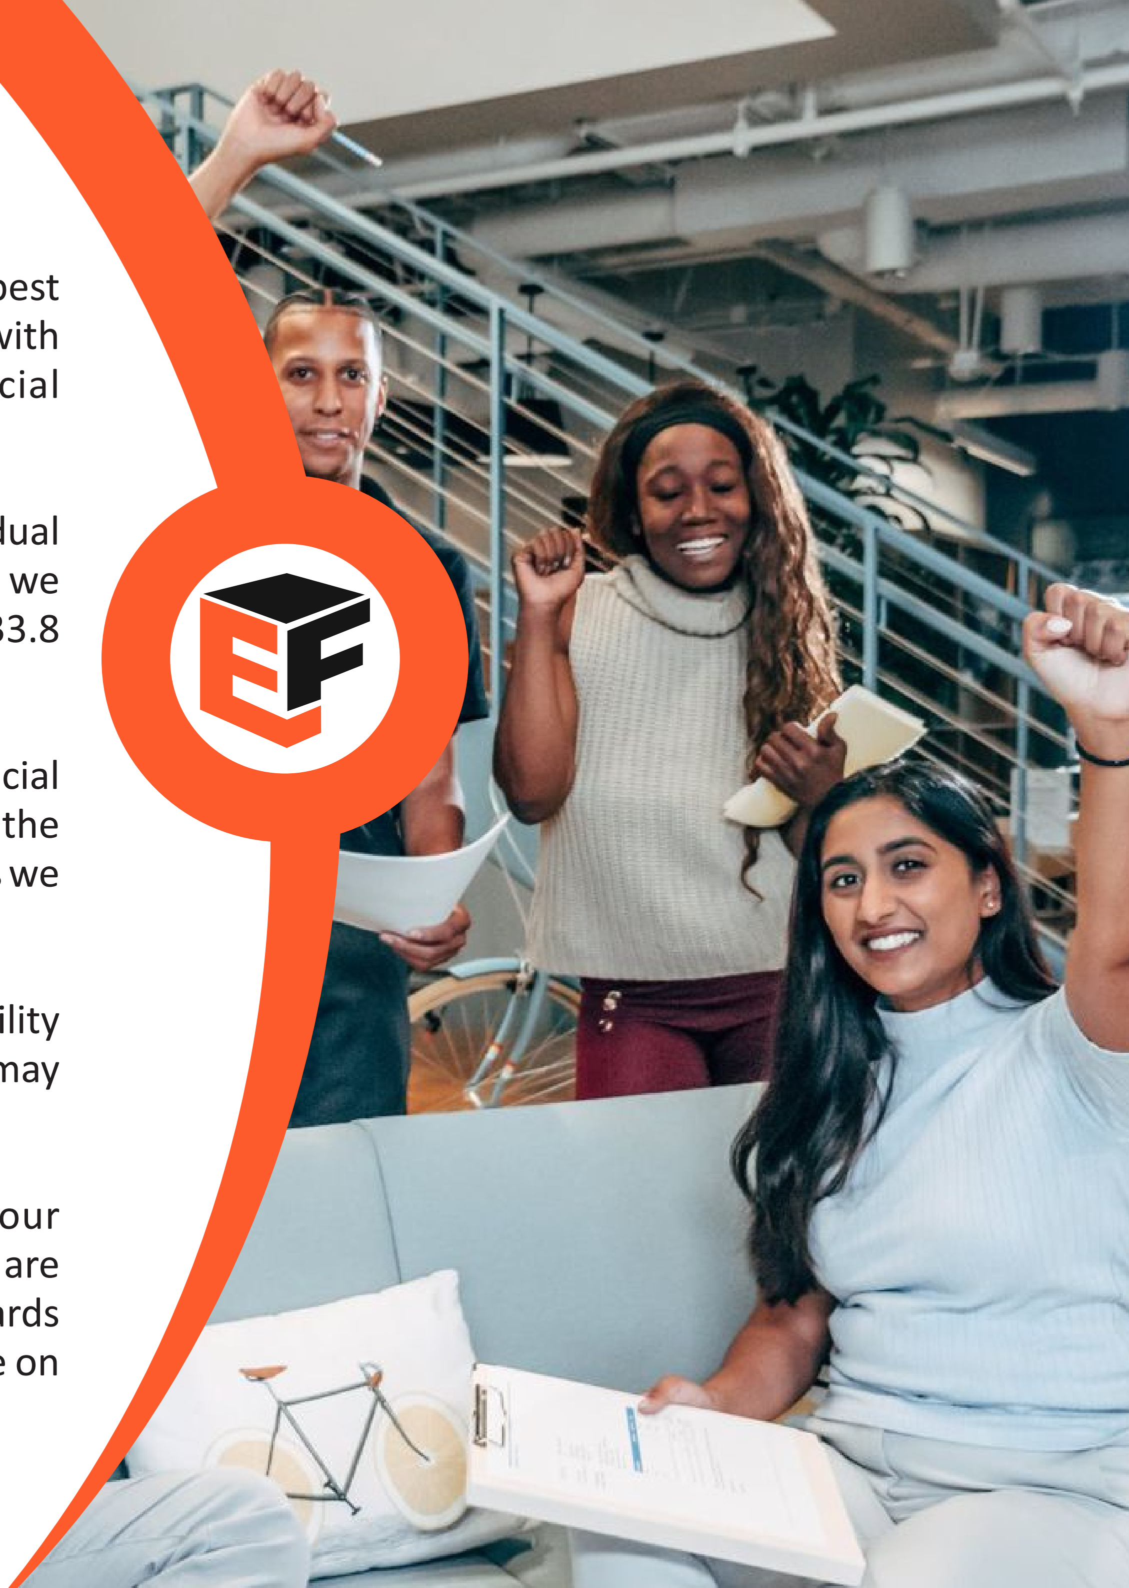
Our responsibility as an asset owner is to create the best customer outcome in terms of general well-being in line with our fiduciary duty, taking into consideration financial security.

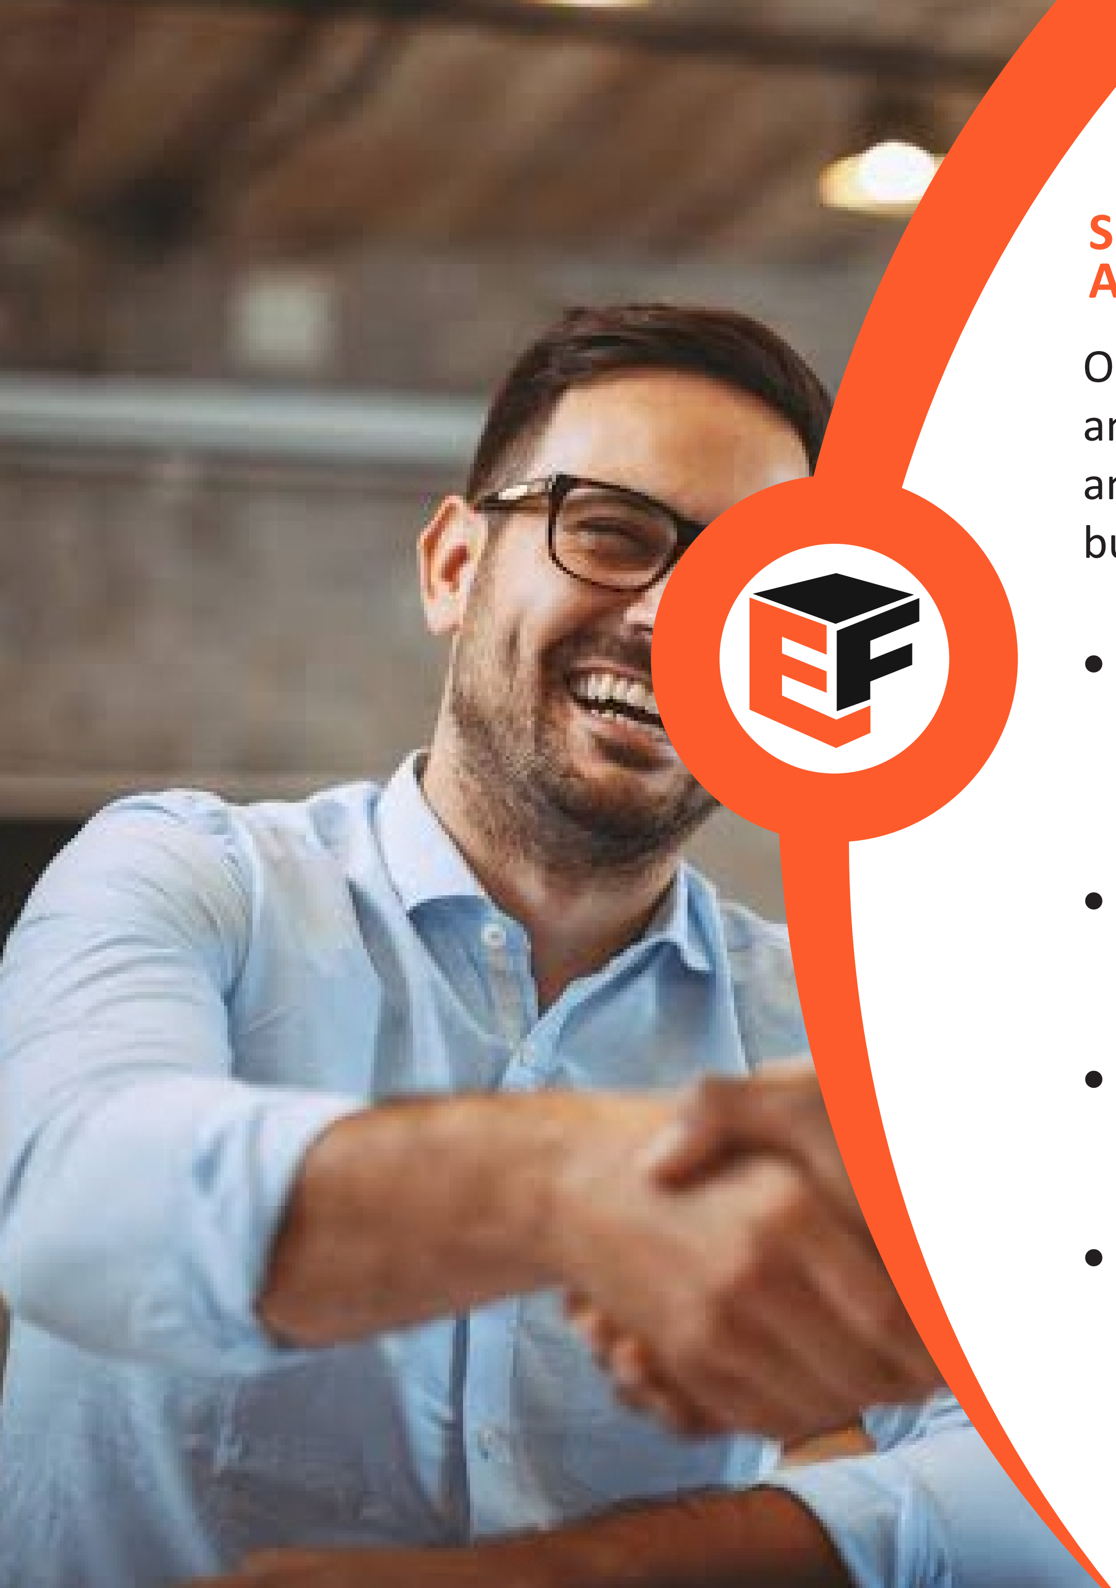
We also invest as an asset manager on behalf of individual savers and asset owner clients. As at 31 December 2022, we manage over £233.4 billion for external clients and £133.8 billion on behalf of our internal client.

As an asset manager, we must aim to deliver the financial outcomes and any sustainability requirements set out in the objectives of each of our mutual funds, or in the mandates we receive from institutional clients.

Sometimes there may be differences in the sustainability criteria that external clients mandate, and in turn these may differ from the requirements of our internal client.

While our values of care and integrity inform all our sustainability work, the asset manager and asset owner are separately regulated businesses with independent Boards and governance processes, and their policies may diverge on occasion.





SUSTAINABILITY PRINCIPLES AND AMBITIONS ACROSS OUR BUSINESS

Our sustainability commitments, principles, and ambitions apply across the investments we make as an asset manager and asset owner, and to our own business operations.

- We will consider sustainability and ESG factors when determining our corporate strategy and new business initiatives.
- We will embed sustainability considerations throughout our business.
- We identify and incorporate ESG risk factors into our general risk management process.
- We consider the interests of all our investors and ensure our views on sustainability are consistent with our long term approach.

- We review our sustainability thinking regularly in order to align with scientific and technological improvements, and changes in the global economy, ethics and consumer preferences.

- We aspire to be a thought leader, to innovate, and to advance understanding of sustainability issues.

- We aim to use our influence as a global investor and asset owner to drive positive change in sustainability policy and corporate standards.

- We believe in active asset ownership and management which encourages companies to transition towards a sustainable future.
